for the year ending December 31, 1964

#### To The Shareholders

Canadian Ice Machine Company Limited was founded in 1912 for the primary purpose of installing ice manufacturing plants.

This activity was the beginning of your company's Refrigeration Division.

### Refrigeration Division

As other applications of mechanical cooling came into use, the dairies, breweries, meat packers, vegetable processors and many others looked regularly to Canadian Ice Machine Company for their refrigeration needs. In recent years the use of mechanical cooling for curling, hockey and skating rinks has become commonplace.

Other uses are not as well-known. Your company, for instance, provided the equipment to produce 250 tons of ice per day to cool the 2,800,000 cubic yards of concrete required for the construction of Quebec Hydro's Manicougan 5 dam, 125 miles north of Baie Comeau. Similarly, we provided 1,600 horespower of low-temperature refrigeration equipment to enable Associated Mining Construction Ltd. to freeze ground some 1,200 feet below the surface. The purpose is to hold back water-bearing strata and quicksand (Blairmore) until mine shafts can be sunk to reach the rich potash beds over 3,000 feet below the surface. This project, for United States Borax and Chemical Corporation, is near Elstow, Saskatchewan.

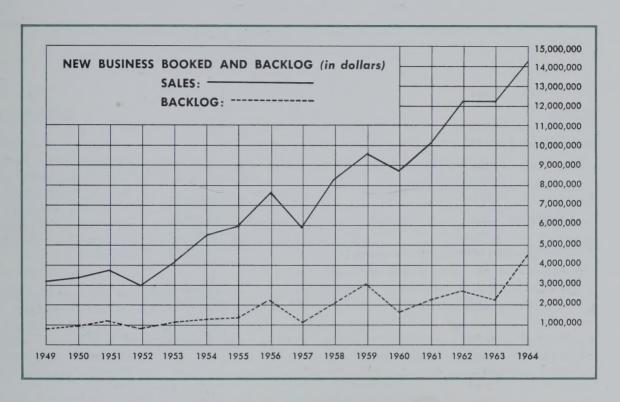

### Mechanical Contracting Division

The use of refrigeration spread logically into the field of providing human comfort. Ventilation was added to heating, and mechanical cooling and humidity control were added to these. Modern air conditioning was born. Your company expanded rapidly into this field. As the control of indoor conditions spread to hotels, office buildings, apartments, and other such structures, the boiler plant, plumbing and other mechanical work was added, and out of all of this evolved plumbing, heating and air conditioning contracting or, as it has become known in the trade, mechanical contracting.

Your company's Mechanical Contracting Division, as a part of the fast growing Canadian construction industry, works closely with architects, consulting engineers and general contractors. The list on the last page of this report is typical of the office buildings, manufacturing plants, apartment buildings, laboratories, hotels, churches, schools and other of our projects and representative of the architects, consulting engineers and general contractors with whom we work.

### National-Shipley Limited

As your company developed during its fifty-two years it became necessary to separate the contracting function from its manufacturing and wholesale distribution of products. Thus, Canadian Ice Machine Company Limited remains the contractor as it originally started, and its wholly-owned subsidiary, National-Shipley Limited, has become the manufacturer and distributor of products across Canada.

Each company is operated independently as to profit and loss, and each has its own operating managers to provide the desired results. There is no overlapping of management except the obvious tying together of the subsidiary and parent company at the presidential and board of directors' level.

### Consolidated Results

As indicated on the above chart new business booked in 1964 was a record high of \$14,200,504.00, and the backlog of business carried into 1965 was also an all time high of \$4,535,846.00. The 1964 net profit, after taxes, \$209,118.85, amounted to \$8.36 per share of Class 'A' stock and \$3.44 per share of Common stock.

The volume and class of business booked so far in 1965 is most encouraging. With our increased backlog, we have confidence that 1965 will be a good year.

On behalf of the Board,

Hacter L. Mar

### Refrigeration Certified Maintenance Company Limited

The results of this company are not included in the reports presented herein as it is not a wholly-owned subsidiary. The net profit of 'R.C.M.' for the year ended December 31, 1964, amounted to \$9,606.42.

#### CANADIAN ICE MACHINE COMPANY LIMITED

and its wholly-owned subsidiaries

#### AUDITORS' REPORT

To the Shareholders of Canadian Ice Machine Company Limited:

We have examined the consolidated balance sheet of Canadian Ice Machine Company Limited and its whollyowned subsidiaries as at December 31, 1964, and the consolidated statements of income and retained earnings for the year ended on that date and have obtained all the information and explanations we have required. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, and according to the best of our information and the explanations given to us and as shown by the books of the companies, the accompanying consolidated balance sheet and related consolidated statements of income and retained earnings are properly drawn up so as to exhibit a true and correct view of the combined state of the affairs of Canadian Ice Machine Company Limited and its wholly-owned subsidiaries as at December 31, 1964, and the results of their combined operations for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Toronto, Canada, March 4, 1965. THORNE, MULHOLLAND, HOWSON & MCPHERSON
Chartered Accountants

#### NOTES TO FINANCIAL STATEMENT

Year ended December 31, 1964

#### 1. Fixed Assets:

Title to certain land and buildings is subject to payment of the balance owing under the lease and agreement of sale.

#### 2. Dividends:

Payment of dividends on Class "A" and common shares is subject to certain restrictions under the terms of the Supplementary Letters Patent and the trust indenture securing the Series "B" debentures.

#### 3. Premium Received on Shares Issued:

Options to purchase 5,000 common shares of the company at \$5.00 per share were exercised during the year, resulting in the following increase in the premium on shares issued:

Balance at beginning of year	\$ 91,500.00
Add \$4.00 per share re 5,000 shares issued for cash during year	20,000.00
Balance at end of year	\$111,500.00

#### 4. Contingent Liabilities:

- (a) Notes receivable under discount, \$342,053.68.
- (b) Claim against National-Shipley Ltd., of approximately \$33,052.00, unsettled at December 31, 1964.

#### 5. Lease

In accordance with a lease sale agreement the company is obligated to pay an annual building rental of \$8,989.20, until April 30, 1982.
